POLAROGRAPHIC REDUCTION OF TETRAVALENT
GERMANIUM IN A SOLUTION OF COMPLEXANT
ORGANIC ACIDS. [1962] 9p. 8 refs.
Order from SLA \$1.10

Trans. (e) (n) Ricceri Scientifica (Italy) 1959, v. 29,
no. 1, p. 100-105.

DESCRIPTION: *Germanium, Solutions, *Organic
acids, Polarographic analysis, Reduction.

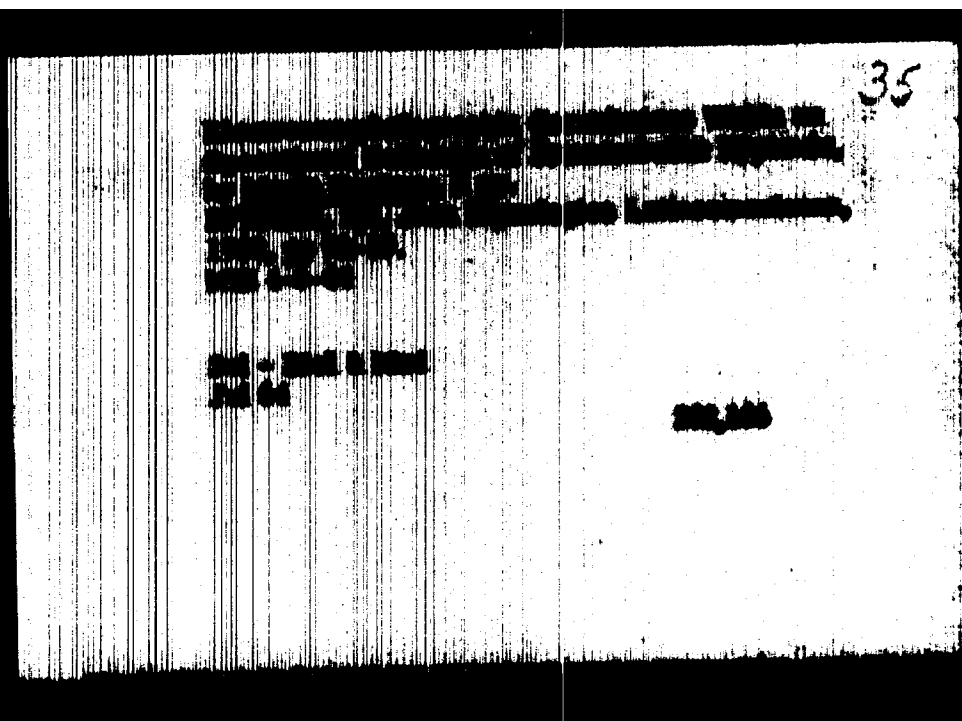

An investigation was made of the polarographic re-
duction of tetravalent germanium in solution of com-
plexant organic acids, i.e., salicylic, malic, and
tartaric acids. Values are given for coefficients and
constant for the diffusion current obtained by operating
in the reduced media and gives the optimum pH range
in which the polarographic cathodic reduction assumes an
analytical significance.
